CURIC CLUB OF CHEMISTRY

REPORT ON EVS TOUR

Date of visit: 6/11/25

Location: Guindy National Park, Chennai

Organized by : Department of chemistry, Curie Club of Chemistry & IQAC

No of participants: 12 students

Objective: To observe and learn about biodiversity ecosystems and conservation efforts in a National Park.

Department of chemistry, Curie Club of chemistry and Internal Quality Assurance Cell organized a Evs tour. Our Educational visit to Guindy national park, Chennai provided a unique opportunity to explore the Park's diverse Flora And Fauna. We observed various Wild Life Species in their natural habitat and learned about conservation efforts from Park Rangers. The visit helped us understanding the Importance of Preserving Ecosystems And The Role Of National park In Conservation.

Outcome:

The visit was informative and engaging, providing valuable insights into wildlife conservation and ecosystems. It highlighted the significance of protecting our natural resources and the need for sustainable practices.
